EZ TANK Inventory Management Solution

Triton Chemical is proud to offer our unique Keep-Fill Inventory Management Solution. The custom engineered tank design allows for maximizing space requirements, eliminates waste of empty containers and takes the worry out of keeping track of inventory. By using our high-quality Brewery Cleaning Chemicals, we maximize your dollars and inventory turns. The unique **EZ-TANK** system brings convenience, and locally owned service right to you.

How Does It Work?

Once Installed, your Triton Chemical representative will monitor your inventory based on usage history and regular checkups. All Deliveries will be pre-approved by the brewery. No surprises!

Safety:

No more employee handling of chemicals or the risks associated with receiving totes and drums or other containers.

Reusable:

Unique refillable **EZ TANK** will save you the money and time spent ordering, receiving, storing, handling, and disposing of containers. No container deposits or delivery charge if in MN delivery area.

Efficiency:

Triton creates just the right chemical solution for your brewery's cleaning problems and is delivered when you need it. Chemistry remains fresh and you only keep 30-60 days of inventory, freeing up your cash for other items. Saves space over the larger containers.

Triton EZ TANKS vs THEIR Drums and Tanks.

Our Triton **EZ TANKS** eliminate the hassles and costs of handling, receiving, inventorying, ordering and disposal of "throw-away" and/or "returnable" containers. Our system offers employee safety and efficiency and is better for our environment with no drums to dispose of or having to entrust to others for recycling. It is an overall process improvement. Our highly trained and experienced Triton staff are available to work with you and your staff as an integral partner of your brewery operations.
